<p>This report presents, for each of fourteen categories of Outpatient Nonavailability Statement (ONAS) procedures, grouped by inpatient and ambulatory professional services, and performed within all Army billable medical treatment facility catchment areas during the second quarter of Fiscal Year (FY) 1992, the totals of government payments (TGP), amounts allowed (AAS) and billed (ABS), number of services, corresponding number of patient episodes, percentages of TGP to AAS and to ABS, and averages of all dollar amounts, by service and by episode. Appendix A summarizes by ONAS procedure category TGP, AAS, ABS and the percents of TGP to AAS and to ABS. Appendix B shows the number of services and episodes, and the averages of TGP, AAS and ABS per service and per episode. Both sets of appendix tables are computed by medical treatment facility catchment area, including Brooke AMC, and as Summary tables totaling all catchment areas. Appendix C contains the Summary tables from Appendices A and B which include the initial entry of Brooke AMC data combined with other Army catchment areas, and also Summary tables without Brooke for comparing with previous quarters. Starting with this quarter, Ft Drum MEDDAC transactions have been moved from out-of-area catchment and labeled specifically as the Ft Drum catchment area.</p>

Executive Summary

This report is one in a series of Gateway Management Analysis Reports and presents detailed cost data for each of fourteen categories of Outpatient Nonavailability Statement (ONAS) procedures, grouped by inpatient and ambulatory professional services and performed within Army billable medical treatment facility catchment areas during the second quarter of Fiscal Year (FY) 1992. Costs include the total government payments for services (TGP), the amounts allowed for the services by the fiscal intermediary (AAS), the amounts billed by the provider for the same services (ABS), the number of services, corresponding number of patient episodes, the percentages of TGP to AAS and to ABS, and the averages of all dollar amounts, by service and by episode.

Appendix A summarizes, by category of ONAS CPT-4 procedures, TGP, AAS, ABS, and the percents of TGP to AAS and to ABS. Appendix B presents the number of services and episodes, and the averages of TGP, AAS and ABS per service and per episode. Both sets of tables are computed by billable medical treatment facility catchment area (pp. A-1-72, B-1-72) and as a summary combining all catchment areas (pp. A-73-74, B-73-74). Starting with this quarter, Ft Drum MEDDAC transactions have been extracted from out-of-area catchment and labeled as the Ft Drum catchment area. This change is only a shifting of the labeling of data by catchment area and does not constitute the "addition" of new transactions/data to Summary tables in this quarterly ONAS report. However, the report also contains the initial inclusion of Brooke AMC medical treatment facility data in with that of the other Army catchment areas. Because Brooke is a new catchment area with additional data being added to the report, Appendix C has been included to assist in comparing results from the second quarter of FY 1992 with previous quarterly ONAS summaries. Appendix C contains the Summary tables from Appendices A and B which combine Brooke AMC totals with other Army catchment areas totals (C-1-4) for the quarter, and also Summary tables excluding the new Brooke data (C-5-8).

Outpatient nonavailability statement professional workload is presented by both services and "episodes". Services are the number of treatment encounter records submitted. Episodes were computed by sorting claims by patient identification number, treatment date, and procedure. All claims for a unique patient/date/procedure level were counted as being one episode. Using the patient per episode logic effectively controls for service billings where, when applicable, the technical and professional components are billed separately.

Total government payments for the claims, AAS, ABS, number of services, number of episodes, and additionally the total amount allowed for the claims were then grouped and summed by

billable medical treatment facility catchment area, by type of professional service (inpatient/ambulatory), and by ONAS category of procedures. Government payment for each category of ONAS procedures was estimated by aggregating within each group the sum of the total amount allowed for the service, the total amount allowed for the claims, and the total government payments for the claims. Each group's amount allowed for services was then divided by its amount allowed for claims and this ratio was multiplied by the group's sum of government payments for the claims, thus obtaining the total government payment for the group. Transactions having no government cost, no patient cost, and no total amount allowed were deleted prior to summation, as well as those where the fiscal intermediary denied the claim. Each ONAS procedure record in the second quarter of FY 1992 data was extracted from the TCSDP main database based upon a payment date in this quarter. Therefore, amounts in these tables may reflect an unstable condition due to part of a claim payment being paid outside the time interval (i.e., FY 1991 and/or the first quarter of FY 1992). Whenever possible, obvious unstable conditions were marked with an asterisk (*). Sometimes under these unstable conditions, some equations were not computed. In such cases, a decimal point (.) was used to fill space for answers not computed. Decimal point notation was also used to fill space when a variable had no data for a grouping.

In Appendices A and B, TGP for ONAS professional procedures in a catchment area ranged from a low of \$10,268 to a high of \$216,114, with the corresponding AAS from \$14,804 to \$270,125, ABS from \$17,376 to \$368,119, number of services from 47 to 620, and number of episodes from 40 to 541. Total government payments for all ONAS procedures in all catchment areas for the second quarter of FY 1992 was \$5.97 million, while AAS and ABS for the identical services/episodes were \$8.43 and \$11.46 million respectively. The number of services in total across all catchment areas for ONAS procedures was 21,968, with 19,047 patient episodes. In the second quarter of FY 1992, 27.1% of TGP for all ONAS procedures, and 24.3% of the corresponding number of services with 26.8% of the episodes, were for professional claims submitted while the patient was either an inpatient at a hospital, or when a hospital submitted institutional billings ambulatory episode in conjunction with the ONAS professional billings. These services are labeled Inpatient Professional Services in Appendices A and B. System-wide, the professional services ABS per episode ranged from \$278.00 to \$1,689.87 for ambulatory professional services depending on the category of ONAS procedure.

Total government payments rendered for ONAS professional services over all catchment areas for the second quarter of FY 1992 ranged from only 54.2% to 97.6% of what was actually

allowed by the fiscal intermediary for the same services. Again, the government paid from only 41.2% to 75.2% of the amount billed by the provider, when examining all catchment areas as a whole. The differences between what the government actually paid and what was either allowed or billed were a result of disallowed charges, patient co-pays and deductibles, and coordination of benefits (other health insurance payments) which designated CHAMPUS as second payer. These "adjustments" to billed and allowed charges, as demonstrated above, are substantial. Also, some of the tables in Appendix A compute TGP as being 100% of AAS and/or ABS. This condition is usually confined to when the patient is treated on an inpatient basis and there is no co-pay. In addition, on several occasions the number of episodes for a procedure is greater than the number of services. This situation occurred when one of the services was an adjustment and no workload credit was given.

Technical Note. The following TCSDP data were utilized for report:

MEMORANDUM FOR Defense Technical Information Center, ATTN: DTIC-
OCC, Catalog Branch, Building 5, Cameron Station,
Alexandria, VA 22304-6145

SUBJECT: Release of Limited Reports in DTIC

1. Enclosed is a list of reports submitted by Health Care Studies and Clinical Investigation. At the time of submission we requested these documents be limited to DOD agencies only. This limitation no longer applies. Please remove the limitation on all the listed reports (enclosed). These reports should now be "Unlimited, Available for Public Use."
2. By lifting the limitation on this reports, will they now be provided to National Technical Information Service? This agency would like these documents placed with NTIS for a wider audience.
3. Point of contact is Beverly Rakowitz DSN 471-0047/9610 or commercial 210-221-0047/9610. Mailing address is Directorate of Health Care Studies and Analyses, Cdr, AMEDDC&S, ATTN: HSHN-R, 1608 Stanley Road, Fort Sam Houston, TX 78234-6125.
